

TFS Green boosts environmental desk by appointing UBS trader Luca Bertali

Tradition, the leading interdealer broker, has today announced the appointment of Luca Bertali to its London-based environmental desk, TFS Green. Bertali will focus on the creative structuring of primary market transactions.

A highly-experienced emissions trader and broker, Bertali joins TFS Green from investment bank UBS, whose carbon business he led for two years.

Says TFS Green's global manager Lucy Mortimer: "We are delighted to welcome Luca to TFS Green. His strong market background and depth of knowledge make him a highly valued addition to the team and will help us to continue to develop into new markets."

TFS Green specialises in renewable energy and emissions markets, focusing on Joint Implementation and Clean Development Mechanism. It is expanding into new markets in the carbon arena and recently brokered the first Gold Standard Clean Development Mechanism project in China—which was this week voted "Deal of the Year" by the editors of Energy Risk Magazine. TFS Green has also recruited broker Song Yang in Beijing to help develop its business in China.
