Tradition’s Italian Power Desk closes its first Italian gas trade for June

On 21st May 2010 Tradition’s Italian Power Desk closed the first Italian gas trade for the product of JUNE at the price of 20.70 €/MWh. This was for an effective volume of 12,500 MWh (1,500GJday) between two Italy-based energy companies.

Michael Anderson, Head of Energy (Europe) at Tradition comments,

“This is a natural progression for our Italian Power Desk as more of our Italian clients have become interested in gas and are looking to trade on the relationship between the power and gas markets. Our four-person strong specialist desk has been able to generate liquidity in the Italian power market in a way which other brokers have not. This is largely due to the depth and spread of the relationships they hold in the market. We anticipate more activity in the gas market and are providing a screen with direct trading access for our clients.”
